Applications and use

Fasson PET silver is specifically designed for industrial labels. The main area of application for Fasson PET silver is the labelling of industrial products. Nameplates and logistics labels are typical examples. This product is distinguished by its high chemical resistance.

For special requirements we strongly recommend application tests.

As with all pressure sensitive materials, this product should be tested thoroughly under end-use conditions to ensure it meets the requirements of the specific application.

Shelf life

Two years, stored at 22°C / 50% RH.

This issue replaces all previous issues.

The specifications given above are based on existing findings and empirical values. It is the user's own responsibility to check, prior to use, whether the product is in fact suitable for the intended application, and with particular reference to any influential factors peculiar to the application for which the product is to be used. All matters relating to our guarantee and liability in respect of the above product, including the period of guarantee, are governed by our currently valid General Conditions of Sale in so far as these conditions do not contravene any overriding legislation. Subject to technical changes and improvements without prior notice.
